- Optional LED lighting
- Optional 2" thick backsplash to accommodate receptacles

## CUSTOM DESIGN TO YOUR NEEDS AND REALIZE YOUR VISION

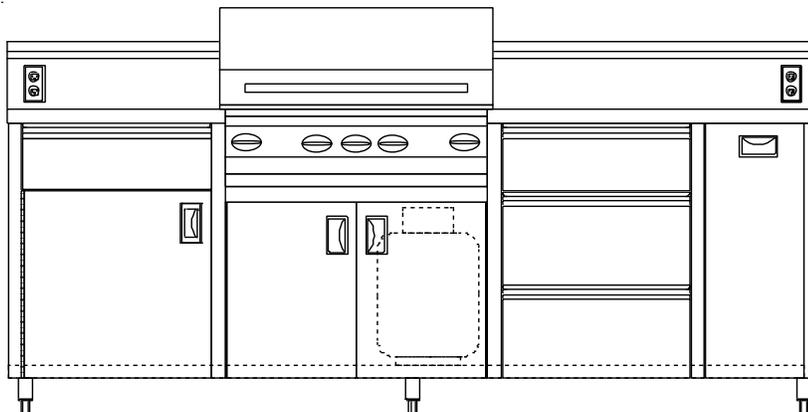

Each kitchen is tailored and custom built to every client. Every kitchen has its own set of criteria from the customer type, to space, design and tastes. Our design team carefully listen to every need, desire and expectation of the client. Once the expectation is realized, the design phase commences and we work tirelessly to ensure every detail is perfect before beginning production.

Design encompasses a lot of ideas, concepts, expectations and goals. These are all things we take very seriously when working with our clients to provide the most unique kitchen design. Every kitchen is one of a kind!

The process is simple, just contact us via e-mail or phone with your plan. Your ideas can be a large set of construction drawings, or even a simple drawing, we can work with anything. Sometimes there are no revisions, sometimes there are many, but we are here until it is absolutely perfect! Once the design is nailed down, and drawings are complete they will be sent to you for final approval. Once approved, a deposit will be made and production will begin on your build.

Cabinet designs are not limited in anyway, combine drawers, doors to come up with what works for your needs and space.
